Work is the only true guarantee of success, by which, in the long run, added value is created for the customer, employee and owner. Each job at AYRIS LOGIC should be done according to the highest quality standards and in accordance with the best pratice.

08 Team Spirit

By uniting individual characteristics, we achieve much better results than we could achieve as a group of individuals. AYRIS LOGIC's team spirit enables each employee to fulfil his/her full personal and professional potential.

Our Strenghts

We capitalize on our strength of delivery excellence and core competencies including decades of IT services experience, flexible & unique engagement models, deep domain & delivery expertise, proprietary tools & frameworks, technology alliances and a global reach to be a proven business partner for our clients.

We use our vast experience, expertise and a 'whatever it takes' work ethic, to deliver IT solutions tailored specifically to your requirements and satisfies your business needs as our customer.

Services

1-Oursourced IT Support

1.1) USER SUPPORT

Many businesses rely on an in-house expert – whether it's someone in their IT department or just a "power user" — to deal with common user problems. Unfortunately, this means that when technical issues arise, two employees are taken off tasks that could deliver more value to the business. AYRIS's help desk and dedicated technicians ensure that your workforce stays productive while we take care of technical problems. And because most problems can be easily remedied over the phone, you're spared the expense and the wait of an on-site visit.

1.2) HARDWARE AND SOFTWARE PURCHASING

Your AYRIS Team can maximize your technology budget by helping you find the best hardware and software solutions for your business. First, we sit down with you and make sure we understand the business problem you're looking to solve – not just the technical problem. We'll evaluate your current systems to make sure we can get the best value out of your existing investments. Then, we recommend not just the right equipment but the right strategy to get your business to where you want it to be. Our partnerships with tech leaders ensure that we can get you the right products to solve the problem at prices that won't break the bank.

Services

1-Oursourced IT Support

1.3) NETWORK SUPPORT

Make your network work for you, not the other way around. Your
AYRIS Team can design the network you need whether your staff is
large or
small, in-house or mobile. From traditional LANs to the latest wireless
LAN technology solutions, AYRIS to know to utilize it.

1.4) PREVENTIVE MAINTENANCE

Our focus remains firmly on ensuring the continual health of your I.T.
environment. To do so (and as part of our extensive I.T. support service)
we provide a tailored combination of personal contact, remote man-
agement and preventative maintenance. From our experience through
this I.T. support service, incidents are quickly averted, ensuring
maximum availability of your business critical applications

1.5) CONSULTING SERVICES

Let AYRIS be your virtual Chief Information Officer (CIO). Our team can
consult for your small to medium size business on all your technology
needs.

Services

2-IT Security Service

A comprehensive IT security strategy is a critical component of the success of any business. Without it, organizations leave themselves open to the countless security risks threatening businesses today. Through our IT Security Services, All Covered employs best-in-class measures to build a comprehensive plan encompassing cyber security, mobile protection and cloud backup and recovery.

2.1) NETWORK SECURITY

Network Security defines the activities that a company or organisation takes to protect its network and its data. It is a basic requirement for all businesses. Threats to a company's network are many but the most common are spread over the internet.
These include:
• Viruses, Worms & Trojans
• Data interception & theft
• Spam
• Computer Hackers
• Spyware, Malware & Adware
• Data interception & theft

2.2) EMAIL SECURITY

Stop email attacks while concealing critical messaging gateways and shielding email servers. Our email security and continuity works in the cloud to block over 99% of spam, malware, viruses, worms, phishing scams, spyware, ransomware and fraudulent emails outside your network. Securing emails means better overall cyber security for your business.

Services

2-IT Security Service

2.3) PATCHING & ENDPOINT PROTECTION

Keep your systems current and running smoothly with patching IT security services provided by AYRIS LOGIC. We fix IT security vulnerabilities and other bugs affecting your programs.
Secure your servers and work stations from external risks, improving your IT security posture and user productivity, with our endpoint protection services
.

2.4) IT SECURITY ASSESSMENTS

Strategic testing and assessments are necessary to identify shortfalls, vulnerabilities and other areas for improvement. All Covered provides a number of assessment services, such as penetration testing and vulnerability assessments, that can help you learn where gaps may expose your company to risks

2.5) ADVANCED SECURITY

Our complete suite of advanced security services go one step further in protecting your company. We provide a dedicated team of engineers and 24/7/365 support to assure you are at the forefront of security protection. We provide robust logs and remediation, and adhere to the strictest of security guidelines

Services

Network Solution

Enhance your network's productivity, efficiency and competency with AYRIS IT network solution.
Our network solutions are vast and all-inclusive, designed to meet your needs and planned in such a way as to discourage and minimise future downtime. We believe that the design, implementation and maintenance of any network is crucial to its long term stability and functionality and that is why we offer a multifaceted network service that is well-rounded in its approach.

3.1) Network Design

The design of any network is crucial to its stability and functionality. As they say, a chain is only as strong as its weakest link and so is your network. Our highly skilled Technical Services Team are conversant in a range of I.T. networking technologies and products and will tailor an industry-standard solution that will enable you to run your business effectively and efficiently.

Services

Network Solution

3.2) Network Implementation and Management

It doesn't matter how good your equipment or even how good your network design is. If it isn't installed and set up correctly, it will cost your business in both productivity and money. With AYRIS IT networking service, our team works to a strict protocol that follows tried, tested and proven steps to ensure an effective and efficient network implementation.

3.3) Virtualization

With technology improvements over the last few years in the IT networking field, virtualization software has become an effective way for businesses to make the most of their hardware purchases. Companies can now purchase one physical machine to provide multiple server functions such as SQL, Exchange, etc. where previously they would have needed an individual Server for each function. Our Technical Services Team has been deploying virtualized environments for a number of years and are extremely proficient. We are saving you money not only on your capital outlay but reducing your running costs such as power, air conditioning, space, etc.

These services are offered as one-off independent jobs but, we believe that our greatest strength lies in providing an extensive and thorough network service that encompasses all these solutions. However, we are of course happy to work with you and tailor a plan to your specific needs

AYRISLOGIC/10

Services

4-Application Development

Buy versus build. Sometimes the right choice is to build exactly what you need. But you are not in the technology business, nor the application development business. Be glad. Have you ever tried to manage application developers? Seriously, they speak a different language.

Fortunately, we at AYRIS LOGIC do speak the same language as software and application developers. We can help you identify your requirements, define the use cases, and put together a project plan. We can even do the work. That's right— we can code. If you're curious about building an application so that you can have ex-actly what you need for your business, we can help with the deci-sion-making process.

Don't be shy about what you need. We thrive on solving problems, whether you need a database application or custom reports. Websites or SharePoint. Access or application integration. Data interchange or data exchange. You name it — odds are we have done it or can make it happen for you

Services

5-Design

5.1) WEB DESIGN

A company website is often a good indicator of your brand value. AYRIS LOGIC understands the importance of a professional website design and how to appeal to your clients. We perform market research and help you overtake your competition. Online marketing starts with a professional website.

• USER EXPERIENCE

Our philosophy is that internet marketing starts with a website that will impress your clients and turn traffic into conversions. It is important to have a website design that keeps the user in mind. It is both the placement and look of the elements that create a powerful web design and our company understands that.

• SEO MARKETING

Need to get to the top of Google? Internet marketing is key to your company's success. AYRIS LOGIC with an experienced web design group. Imagine a website where functionality meets professional design. We partner with SEO marketing specialists so that you can get an ROI for your great new website!

• COMPETITIVE

AYRIS LOGIC takes a competitve approach, we truly are set on helping you succeed. With competitive pricing on our incredible web design and marketing packages we make sure you are well taken care of. We take your website to the next level with professional consulting by our marketing specialist

Services

6-Remote Backup And Disaster Recovery

Sure, you've got a data backup solution...right? But does it work? When was the last time you checked?

Do you have a repeatable process for recovering both your data and your business should the unthinkable happen?

If you are like most of our clients, you might be sheepishly looking away from the monitor. Nobody wants to acknowledge that they may have a critical gap in their business operations — especially not when it's in an area that everyone knows is critical.

Therein lies the problem. Knowing what you need when it comes to data backup and business continuity isn't that simple if you are not an IT ninja. When was the last time you thought about recovery time or recovery point objectives?

Let us help with the details. We can set your business up with the appropriate level of both data backup and business continuity plans that are right for your business, no matter what size or industry. We have solutions that span a wide range of situations and scenarios.

BackUp Data

Services

7-CYBER THREAT AWARENESS TRAINING

Reduce threat risk by empowering your employees with Cyber security Education Solution.

Cyber threat awareness training is a fully managed cyber security training service which encourages a change in behaviour.

Our Services :-

Test

• Monthly Phishing Attack Simulation encourages a change in behaviour to make employees more cautious when dealing with suspicious mails. Also measures the level of awareness in company.

• Periodic online assessment measures level of awareness.

Train

• Additional online learning module assigned to relevant employees. Modules are interactive with focus on exercises rather than pure reading. Gamification used to make learning more fun.

• Online learning can be automatically assigned for those that fail Phishing Simulation for a Just-In-Time (JIT) training. Immediate training for those that need it.

Measure

Detailed reports and statistics available for:

• Phishing Attack: Number of employees that opened dangerous attachment, clicked on phishing link, gave away their credentials on phishing site, read the training message completely.

• Online Learning module: Number of employees who started the] training, those that completed, those in progress.

• Assessments: The scores by each staff, department or company as whole. Compare to other companies in your industry.
